ORDER

The Government of India has fixed the support price of two basic varieties of cotton viz., Medium Staple Length Cotton having Staple Length of 24.5 to 25.5 mm with micronaire value of 4.3 to 5.1 and Long Staple Length Cotton having Staple Length of 29.5 to 30.5 mm with micronaire value of 3.5 to 4.3 of new crop of Seedcotton (Kapas) of Fair Average Quality (FAQ) for Cotton Season 2011-12 (October-September). The support price for Medium Staple Length Cotton has been fixed at Rs.2800/- per quintal and that for Long Staple Length Cotton has been fixed at Rs.3300/- per quintal.

2. Based on the support prices for these two basic classes of Seedcotton (Kapas) and taking into account the quality differential, normal price differential and other relevant factors, the support prices for other classes of Seedcotton (Kapas) of Fair Average Quality (FAQ) for the Cotton Season 2011-12 (October-September) are hereby fixed, as under: -
(Rs. / Qtl.)

(i) If the micronaire value is in the range of 3.8 to 4.2 for Staple Length (mm) of 24.5– 25.5 mentioned at Sr. No.6 of above table, a premium of Rs 30/- per quintal will be given over and above the MSP. If the micronaire happens to be less than 3.8 or more than 5.1, the MSP will be lower by Rs 15/- per quintal for every 0.2 micronaire.

(ii) If the micronaire values are outside the range in the column (IV) for staple lengths at Sr. No.9 to 15 of above table, a lower MSP of Rs 25/-per quintal will be given for every 0.2 micronaire value.

(iii) The minimum acceptable micronaire value shall be 2.8 for Extra Long Staple Cotton mentioned at Sr. No. 13 to 15 of above table. Minimum acceptable micronaire value shall be 3.0 for other varieties of cotton at Sr. No. 1 to 12 of the above table.

(iv) The names of varieties mentioned in column No (VI) of the aforesaid table are only indicative related to the respective length group.
(v) The base line moisture content of kapas shall be 8%. The farmer selling cotton having moisture above 8% but upto 12% will get less price proportionately, while it will be a proportionate incentive, if the moisture content of the produce is less than 8%. For the purpose of undertaking price support operation by the designated Procurement Agencies, moisture content of more than 12% is not permitted. The incentive / disincentive will be made on the basis of rate per quintal of kapas on pro-rata basis.

(vi) The procurement agencies should ensure that micronaire and other fibre quality parameters are scientifically assessed by providing the required infrastructure/facilities at the purchase centres.

CCI and NAFED would continue to be the Nodal Agency for procurement of seedcotton (Kapas).
